Short Exposures, High Productivity

Interflex Exposure Units are specifically designed to expose photopolymer printing plates. Therefore reflection lamps (tubes) have been chosen with a wavelength of 365Nm (UVA type), resulting in a powerful and fast exposure. These lamps are fitted with electronic starters, thus no pre-exposure warm up is required and long life is guaranteed.

Technical data for the Interflex IFE 12/16 Exposure

max. Plate size	107 x 152 cm
Height	112 cm
Width	193 cm
Length	191 cm
Weight	523 kg
Load	5,3 kW
Number of UV-A lamps	30 peaces
Year of manufacture	02/2002
